Python
Java
Javascript
shell script (BASH)
HTML & CSS

Software and Tools

git version control
gdb (GNU debugger)
systemd (init system)
Jenkins CI
MongoDB (nosql database)
MySQL (relational database)

Operating Systems

GNU/Linux
Unix

Related Experience

PUMPKIN SPACE SYSTEMS, San Francisco, CA
Remote Engineer (November 2015 to present)

- Created a custom Linux distribution for use on the BeagleBone Black single board computer (used as a flight computer for some company projects)
- Created and maintained a convenient build-automation process for the custom Linux distribution
- Managed continuous integration for company software projects using Jenkins

PUMPKIN SPACE SYSTEMS, San Francisco, CA
DevOps Intern (Summer 2015)

- Worked on a team in an agile environment to develop telemetry-gathering software for company satellites (written in C and Python)
- Customized and configured the Debian-based Linux distribution being used on the BeagleBone Black flight computer to better suit project needs
- System administration and computer networking

ORBITAL INSIGHT INC, Palo Alto, CA
Intern (Summer 2014)

- Manually evaluated and processed initial data during development of company's geoanalytics pipeline
- Helped determine availability and viability of new data sources to be used in the analytics pipeline

Other Experience

BOSTON UNIVERSITY, Boston, MA
Resident Assistant (November 2015 to present)

- Conducted administrative tasks and planned community events for 40 undergraduate residents

Natural Languages

Proficient in Spanish and conversant in Arabic
